

# GEC SERIES COUNTING SCALES

## DESCRIPTION

The GEC Series is specifically designed to count parts. Its numerical keyboard allows entering quantities as unit weight, number of parts, limits and tare.

The four LCD displays show the weight, number of pieces, unit weight and status, simultaneously. The information obtained during the operation ensures highly reliable results.

The GEC Series is equipped with a large stainless steel weighing pan of 250mm x 210mm, a full tare range, large LCD display with internal backlight, an internal rechargeable battery with 300 to 600 hours of operation, depending on the use of backlight function, and a low battery status indicator (red led: currently charging status, green led: charging completed).

The GEC Series can count parts by introducing a previous sampling or a known unit weight, or by reducing the number of items on the pan.

A special design is incorporated to protect the loadcell from overloading. It also includes a dust transparent cover to avoid the entrance of liquids and dust.

## FEATURES

- Three Retro Illuminated LCD Displays
- Numerical Keyboard of Direct Access
- Overload Protection
- Stainless Steel Weighing Pan
- Internal Rechargeable Battery

## SPECIFICATIONS

MODEL	GEC-1.2	GEC-3	GEC-6	GEC-12	GEC-30
Capacity	1,200g	3,000g	6,000g	12,000g	30,000g
Division	0.2g	0.5g	1g	2g	5g
Minimum Sample	0.04g	0.1g	0.2g	0.5g	1g
Platter Size	250mm x 210mm				
Scale Size	240mm x 285mm x 105mm				
Power	6V Rechargeable Battery at 2.5Ah or AC Adaptor 9V, 500mA				
Scale Weight	3.3kg
