

WEIGHSLEEVE GenX PALLET JACK WEIGH SYSTEM

DESCRIPTION

Convert your ELE, Hi-Lifter or low-profile pallet jack into a weigher. One of the major problems associated with wanting to weigh pallets on the move has been the requirement to replace an existing pallet jack with a more expensive unit that incorporates an in-built weighing system – until now.

The WeighSleeve GenX system comes in a kit form and uses two ultra-low profile weighing platforms fitted directly on top of the pallet jack tynes. There is no need to cut, weld or modify the tynes or fit loadcells under the tyne.

They are also interchangeable between similarly sized pallet machines allowing flexibility if you need to replace your machine (that is, simply remove the kit and fit it to a new or existing unit). The weight indicator is battery powered offering many hours of reliable and accurate weighing between recharges.

FEATURES

- Accurate, Robust, Reliable
- Basically Maintenance Free
- Simple to Install and Interchange
- Dimensions: Made to Order but Typically 1,040mmL x 145mmW x 15mmH
- Weight: 7.5kg per Sleeve
- Maximum Capacity: 2,000kg
- Backlit LCD weight display with 20mm high digits
- Zero and Tare Functions
- Self-Contained Rechargeable Battery with 30hrs

WEIGHSLEEVES FITTED TO HI-LIFTER
